EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was implicit via Applicant's filing of a non-entered amendment on 26 March 2007.

In the Specification, an examiner's amendment is attached as filed by Applicant 26 March 2007.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest the method of producing compressed earth block wherein a continuous compressed block is sheared by moving a shearing chamber (a) transverse out of alignment with the compression chamber and then back into alignment or (b) transverse out of alignment with the compression chamber less than the compression chamber's transverse dimension.

Specifically, Stanga (US Patent No. 3,421,220) address the same problem of shearing extruded product and teaches shearing with a shearing chamber moving transverse to an extrusion chamber (see Abstract and fig. 1). However, the shearing chamber holding the sheared product taught by Stanga does not return to alignment and has movement greater than the extrusion chamber's transverse dimension.
